GOUTURE PAPER & PRINTING

These couture stationery suites and envelopes are all printed on luxurious papers. We do not discriminate to any budget and want everyone to be able to print beautifully designed business cards to start getting your name out into the world. All the printing methods are defined and communicate your style.

PAPER

DESCRIPTION

Cotton Lettra

Lettra is a new paper developed especially for the oldest printing process, letterpress. Made from cotton fibers, Lettra paper feels extra-bulky, even fluffy. Our standard paper is the 110 lb and is crazy thick. We can also use an even thicker version of Lettra for pieces that have side printing. We print both our letterpress and flat pieces on this cotton paper for a luxurious finish at a great price. 100% cotton fibers makes this paper 100% tree-free!

PRINTING

DESCRIPTION

Flat

The perfect substitute for letterpress. Flat printing on our cotton papers meshes wonderfully into the fibers for a classy and unparalleled flat printing finish. Flat printing allows for more color combinations at the same price.

Letterpress

With an intimate and yet professional feel, this “old school” style of printing will make them stand out and be remembered. Letterpress printing gives any character or image a 3-dimensional aspect, because the ink is pushed into the paper. Printing price increases with each color that is added.

Print at Home

For the couple who has a great do-it-yourself spirit, we are excited to offer an alternative to full service printing and design. You will receive a high-resolution, completely designed and print-ready file that you are free to print wherever and however you choose. Print as many as you want!

OTHER OPTIONS

Are there other options for print?

YES!!!

The papers and printing above are our standards. We are completely open to other methods of printing and papers. Please inquire for prices.
